Anti-Static

Steel Gray

Silver Gray

Oak

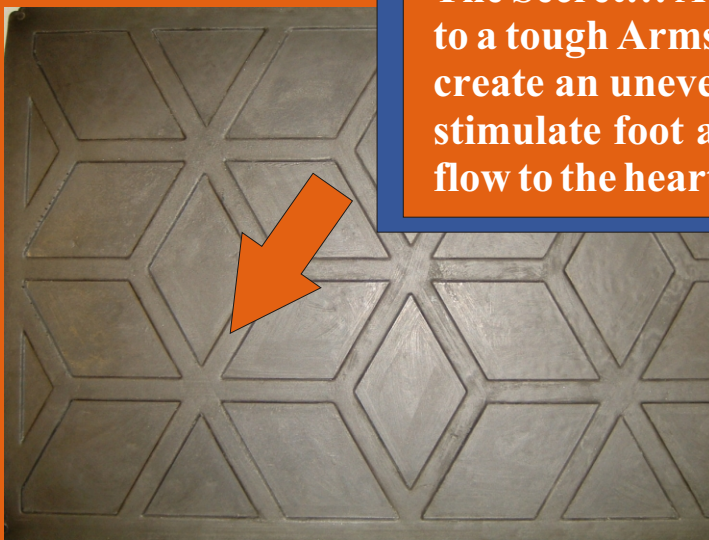

Aqua

The American Podiatric Medical Association has concluded that the human foot is more adaptive to irregular surfaces than to flat surfaces when standing. People whose livelihood depends on standing for extended periods of time will experience the wonderful feeling of cushioned comfort with Standers Choice Health Mats, as the muscle movement in their feet and legs stimulates circulation and blood flow, thereby improving their alertness, state of well-being, and productivity.

The Secret... A patented foam structure laminated to a tough Armstrong vinyl-wear layer, designed to create an uneven yet comfortable surface that will stimulate foot and leg muscles and increase blood flow to the heart.
